

Chapter	1. Asbestos Exposure Assessment, Risk Identification, and Substitutes
Section	A. Asbestos Hazard Identification
No./Title	Asbestos hazard identification
Author/Contributor	Park EK University of Occupational and Environmental Health, Japan (UOEH)
Bibliographic ID	

Introduction

Asian context	Asbestos is still widely used in Asian countries, however, the basic information about asbestos hazards is lacking in the region. This compendium along with the reference documents should provide useful information on asbestos to promote better understanding of its hazard in the region and means for their identification.
Critical appraisal	
Unique keywords	

Abstract	Objective: This compendium describes the types of asbestos and their physical and chemical properties, together with their available hazard information. It is appended by a practical checklist for hazard identification used commonly in Japan.
